

Intravenous Injection Training Arm Model BT-CSIV1

Best Technology Better Tomorrow

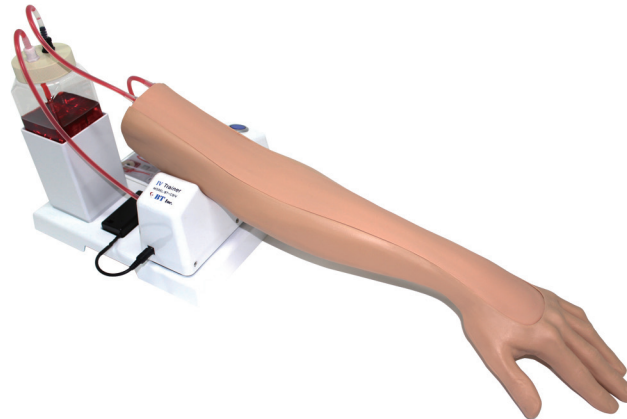

We established BT Inc. to develop the simulators which are much more similar to the human body than the other previous products and are available for various practice and evaluation. We are planning, developing and manufacturing various medical training simulators and models until now.

In order to repay your interest and encouragement which you have given to our company, BT Inc. is doing the best to improve the quality of the products and launch new products continuously.

We promise that we will keep on advancing to become a global and leading company of medical training material industry.
